2021   **DEAN LIST AWARD SEMESTER 1 (2020/2021) – 4.00 GPA**

2022   **DEAN LIST AWARD SEMESTER 2 (2020/2021) – 4.00 GPA**

PREVIOUS PROJECT

2022   **HEALTH DIARY**

- A university course project that me and my team developed. It's a java desktop application that mimics a mobile application. It allows the user to record their body statistic on daily basis and allow the user to view those statistic after organizing and processing on text form and in graph.

2022   **BLOOD DONATION DATABASE MANAGEMENT SYSTEM**

- A web application me and my team developed for another university course project. It is designed to help the blood donation process. The web application has the ability to record patient's detail, record appointment session detail, calculate and display the blood type low on stock, filter patient, generate summary report in pdf and much more.

2022   **GREENVY**

- A mobile application developed with Flutter during the 2022 CodeNection Hackathon. It is a mobile application that aims to spread awareness about our environmental status.
